SPECIAL ANNOUNCEMENTS

NAME CHANGE FOR RESEARCH IN EDUCATION

The title of Research in Education (RIE) was changed with the January 1975 issue to Resources in Education.

The change is being made to reflect more accurately the broad scope of the documents the journal announces. RIE contains abstracts and indexes (Subject, Author, and Institution) of education-related report literature. For the most part, it covers the unpublished, or fugitive type of document, e.g., technical and research reports, conference papers, speeches, program descriptions, teacher and curriculum guides, statistical compilations, etc. The purpose of RIE is to make possible the early identification of, and source for acquiring documents of interest to the national and international education community.

The original title reflected an early emphasis on reporting research projects and results. The Educational Resources Information Center (ERIC), having broadened the range of education materials selected for announcement in RIE, wishes to indicate a wider inclusiveness by means of the new title.

organization of this volume

This volume cumulates the indexes that appeared in the monthly issues of Resources in Education from January through June 1975. This cumulation is intended to be a companion volume to the individual issues of Resources in Education, where the complete resumes of educational documents and their availability appear. It will be most useful to those who have access to copies of the monthly journal.

The four indexes are arranged as follows:

Subject Author Institution

Clearinghouse accession number/ED number Cross Reference Index

Each entry shows the title of the document and the ED number assigned to the complete resume when it was originally announced in **Resources in Education**. The searcher can use this number to locate a particular resume by referring to the ED number ranges that are displayed on the spine and title page of each monthly issue.

The ED number is the key.
